Getting Started
As in many web pages, there are a couple of different ways you can navigate (or go from page to page) in WebCT. This Quick Tip offers some simple explanations on how to easily navigate through WebCT.

The Navigation Bar
The Navigation Bar is located on the left hand side of the WebCT screen. Your professor, or the designer of the course, has access to change add or delete the links on the navigation bar. You may see all of the links that exist in the course on the Navigation bar, or you may only see a few.

The Menu Bar
The menu bar is located near the top of the page, beneath the banner. These links are common links throughout all WebCT courses. Below is a description of each of the links:

- **My WebCT**: The My WebCT link will take you to your personal “My WebCT” page. This page contains links to all of your classes using WebCT, along with announcements, bookmarks, and a link to WebCT’s e-learning hub.
- **Resume Course**: Allows students to resume their place in the Content Module (if your courses uses one. Also called a Path.)
- **Check Browser**: By clicking on this button, WebCT will determine what browser you are on and whether or not it is compatible with the current WebCT version.
- **Log Out**: To log out of WebCT, click on the Log Out.
- **Help**: Links you to the context-sensitive online help.

Breadcrumbs
You will see that as you navigate through WebCT, the titles of the pages that you have visited will be displayed just beneath the course title. These hyperlinked titles are called breadcrumbs because they record the path that you’ve taken. You can click on any of the breadcrumbs to return to a page that you have already viewed.

Icons
In the main content area of you WebCT Course, you will see some icons. These icons may link you to another page with more icons, a web page outside of WebCT, or a WebCT Tool such as the calendar.

Conclusion
If you are unable to find information in the WebCT course, please contact your professor directly.
